SPECTACULAR SUCCESS Rewarding New Refinements in a "Successful Six"

ALWAYS a great car... always an outstanding value... always a "Successful Six"... Pontiac Six now earns its right to even more spectacular success.

Sweeping new refinements in the sturdy Pontiac Six-cylinder engine... for example, New Marvel carburetor, improved manifold... add new and greater smoothness to Pontiac performance.

New, smarter, smaller wheels, with larger tires, further enhance the sparkling beauty of Pontiac's "Body by Fisher".

You can drive Pontiac Six as far and as fast as you wish with perfect peace of mind and security. All of Pontiac's famous stamina is here... and all the quality features which won Pontiac its amazing success in the past... the famous G-M-R Cylinder-head; the foot-controlled headlights; the Lovejoy Hydraulic Shock-Absorbers, etc.

Spectacular success could not help but reward this most recent evidence of Pontiac's progressive policy.

Come in and learn why Pontiac is winning increased popularity throughout Canada. P.O. BOX 282. Ask your dealer about the C.M.A.C. Deferred Payment Plan which meets buying needs.

BILLY ARMSTRONG

The youngest piper in Canada, who blew himself to the Highland gathering at Banff. See him smiling—and the eyes of medals and a. Billy may be good; but he has a long way to go for, 'tis said, bagpipes did the violin are unique in this respect, that a performer on either instrument has never finished learning. Harold Eastman Kerr, musical director for the Canadian Pacific Railway, who contributed largely to the success of the Banff festival, and who is the authority for this statement, added that another point is that the bagpipes are a certain index of a player's physical and emotional condition.

Break Jail But Get Caught Again

Archie and Henry Pecor, of Vancouver, brothers, who have been harvesting in this district, were arrested by constable Dobbin last Friday afternoon, and lodged in the jail, the former for reckless driving and the latter for creating a disturbance.

About six o'clock in the evening they made their escape by means of a hack saw passed into the cell by friends. Discovery of their escape lead to a hunt by a number of townspeople, during which Henry was located by G. A. Morrison and re-arrested by constable Dobbin. His brother Archie, headed west in a car with his two friends, was pursued by A. Johnson and a traveller in a Pontiac car, but a blowout near Carrol, frustrated the efforts of would-be capturers.

The car in which Pecor was escaping broke down near Youngstown, and abandoning it the party hid in a nearby straw stack.

Meanwhile, after looking up his prisoner, and having the damaged portion of the cage welded, constable Dobbin, accompanied by G. A. Morrison and Charles Stewart, J.P., started in pursuit. At Chumock, they received word from A. Johnson in Youngstown, that he had located the abandoned car. Continuing their journey the constable and his party made a search in the vicinity of where the car had been left, but without success.

Henry Pecor was sentenced Saturday morning to 3 months for breaking jail. At the same sitting of the court, G. N. Billwell, who has been working for E. MacArthur during the last ten weeks, was sentenced to three months for theft and committed for trial on a charge of theft of money.

While escorting his prisoners to Calgary, who should board the train at Youngstown, but Archie Pecor and his straw stack companions! Well, well! Pie for constable Dobbin! They received sentence in Calgary: Pe-

Youths From Britain Are Returning Home With A New Vision of This Dominion

Coming here a month ago for a tour of Canada as "ambassadors of empire," fifty representatives of the youth of the British Isles, 25 boys and 25 girls, between the ages of 14 and 21, are returning to their homes in England, Ireland, Scotland and Wales, as real ambassadors for Canada.

Their captivation by the charms and challenges of the Dominion, and their intention to boost Canada by their return home, was declared at a luncheon tendered the party by the city of Montreal.

"We," said Lady Marjorie Dymally, in charge of the 25 girls in the party, "will tell of the wonders we have seen and the practical splendour of Canada, the warmth of Canada's welcome and hospitality, and the warmth of feeling toward us of the Old Dominion. We go home with great memories and high ambitions. We can all do our bit. I believe that if people come out here with open minds and a willingness to work, they will be helped."

Kenneth Lindsey, M.A., Oron, in charge of the 25 boys of the party, said: "We are going back to set up fifty individual selling agencies for Canada. We go back with hopes high and confirmed optimism. We go back with a new vision of Canada."

"We recognize this is a land of milk and honey—but not the milk and honey we are prepared to work; went on Mr. Lindsey. "We are going home to preach the gospel that you want better workers and not chatters."

"We are not concerned about the peaceful penetration of the United States in this country. We are first of all a very great and sincere love for the empire and we feel this scheme has played a contributory part in that unity of empire which is one of the most potent influences in the preservation of the peace of the world."

"We came to Canada seeking the soul of Canada. We have seen something of the real Canada. We have visited typical Canadian cities; we saw the wheat fields, even have had a small part in gathering the harvest, we have visited typical city homes; we have seen your gold and silver mines at work; we have climbed your mountains; we have sailed your lakes; we have seen something of your vast industries and we have seen a great deal of your vast natural resources. And we go back home with a real knowledge of the progress of Canada. We feel that the thing of importance is your future."

Mayor Houde suggested Canada adopt a similar scheme, sending a group of Canadian youths to the British Isles on a return visit to this one. The idea was praised by Mr. Lindsey, who promised full co-operation from the other side if the idea was put into practice.

Chief Of Tobacco Division
Nob T. Nelson, E.S.A., has been appointed chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A., and previously had several years' experience in tobacco culture. The rapid increase in tobacco production in Canada, which has increased from 13,000,000 pounds in 1911, to approximately 40,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

Western Cedar Poles
Recent tests at the Department of the Interior's Forest Products Laboratories, Vancouver branch, show that western cedar poles from fire-killed timber have practically the same strength as those obtained from green trees.

Woman may be a conundrum, but she always has a ready answer.

"Call me at six in the morning."
"There will be no need to call you."
"How do you know that? What will wake me up?"
"Just go to bed and you will see."
—Flegende Blätter, Munich.

Writer Interested In Canadian Home Life

British Woman Journalist Making Trip Through Dominion

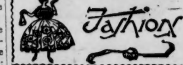

Very few visitors to Canada are impressed with the luxuries of the Dominion, but that is just what strikes Miss Daisy Cryar, London Journalist. Unlike most journalists who visit the Dominion it is not the nation's problems—or its wheat crops which interests her most. She will write of how Canadian women live and describe modern Canadian homes.

The women of the leisure class in England have no idea of conditions as they exist in Canada, according to Miss Cryar. "I am not referring to business women, but women of leisure. They think that is a terrible country and feel sorry for women who have to live here. They have no idea of the luxuries which are enjoyed here," Miss Cryar declared.

Canadian plumbing was one thing which caught the attention of the British journalist. "Your taps are so big. You turn on one and a whole Niagara of hot water comes gushing forth. Then you seem to indulge yourselves. You keep your homes warm, while in England we still depend largely on fireplaces which heat only a small portion of the house is hot."

Miss Cryar writes for the London Daily Mail under the pen name of "Van Glosester." Following her trip to Canada which is partly a holiday one, she plans to go to Paris from where she is writing a series of articles for the London Daily News and London Daily Mail.

Following Regular Course Nothing the Matter With Gulf Stream Say Old Mariners

Two mariners from across the Atlantic have brought word to New York that, contrary to report, the gulf stream is following its regular course.

Some trans-Atlantic shippers had expressed the belief that the warping stream was shifting away from the British Isles, but this was disputed by Captain S. G. S. McNeil, of the Canadian "Mauretania," and Captain Johnson, of the Columbus of the North German Lloyd.

"There has been no change in the course of the gulf stream," said Captain Johnson. "It has been running rather stronger this summer, and this has caused the counter current westward from the northern edge to run a little faster."

"There are a number of people who have been crossing this ocean for twenty to thirty years and don't appear to be aware of the existence of the counter current. There is nothing wrong with the gulf stream," Captain Johnson said.

There is no change in the course of the stream. He suggested that for accurate scientific purposes slow moving ships be sent cross-purpose over the range of the stream to establish authoritatively just what it is doing. Fast-moving ships are impracticable.

A Land Of Homes and Plenty

Comfort and Sound Life Of The People Of The Prairies
"The greatness of this new prairie land—Manitoba, Saskatchewan, and Alberta—is not only in its growing towns but in the comfort and sound life of the country people scattered all over its territory. It is a land of homes and plenty. If its people have to work hard, they find time also for sport and pleasure. Almost every family has its motor car. Every farm house has its wireless, and nearly everyone keeps in touch with neighbors and the world by telephone. The prairies have been trying to develop a new summer route through Hudson Bay, which will save all the long journey across land from Montreal and will hasten the day when these great cities (Winnipeg, Edmonton, Calgary, Saskatoon, and Regina) will be more and more the automobile land of the West—Miami, London, and New York."

Kingdom's Thin Regimen to Mating
They say that while the north and west are slowly rising, the south and east are sinking.

King Alfonso of Spain makes a hobby of medicine and is greatly interested in surgical operations.

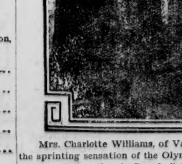

MOTHER OF FAMOUS RUNNER

It is wonderful how many people escape death in a country so full of snakes. As I am writing this, the papers tell how a boy put his hand into a hole in a wall to rob a bird's nest, but the snake had been before him, and was still in the nest, and the child's hand reached the place where the bird's eggs should have been, it touched the snake, which struck, and the child was dead in a few minutes.—Dr. S. P. Impey, in South Africa Cape Times.

Explore Barren Lands
Airplane Survey Finds Northern Tundra To Be Sixty Per Cent. Lakes.

The "barren lands" of the far north were explored recently by a party of three men in a superlative Verbal Explorer monoplane. The Western Canadian Airways, a four-thousand-mile journey took twelve days.

The route taken was from Winnipeg north to Churchill and Chesterfield Inlet, across the Baker Lake barren lands to Fort Smith, Wallace Lake, Reindeer Lake, Cold Lake, and return to Winnipeg.

The trip revealed that so-called barren land territory is composed of sixty per cent. lakes, the explorers stated, and the remainder is barren rock and tangled vegetation.

Removal Of Fear Of War Greatest Factor In Development Of North American Countries

Renunciation of war is symbolized by the Canadian-American border, says the Washington Post, in an editorial commenting on President MacKenzie King's speech, at Geneva.

"All the arguments for peace find support in all the objects to be attained. The international joint commission is the agency for the settlement of the ends at issue, and it always finds support for its judgments."

The Post comments that the "most quickening thing" said by the Canadian Premier, at Geneva, was his conclusion that the removal of the fear of war had been the greatest factor in the development and prosperity of the North American countries, and adds:

"The growing world opposition to war cannot now lose sight of countries for more than a hundred years. The old Rush-Bagot treaty has amplified itself for the ends of amity. The international joint commission is the agency for the settlement of the ends at issue, and it always finds support for its judgments."

Danger From Snakes

Experience With A Deadly Cobra In South Africa

One day my mother was horrified to see, through a window, her baby in this open space playing with a cobra. The little child was sitting in front of the snake pit, with its finger at the quivering mouth of the snake. The snake had reared its head, and was hissing at the child, with its head close to the child's. It was a critical moment, as the snake was in every way started, as snaked, it would have struck at once, and the child would have been dead in a few minutes. What was the best thing to do? The child's mother? My mother did the very best thing she could have done under the circumstances. She took up a mouth organ which was near her, and played soft music on it. This attracted the attention of the snake, and for a moment it left the child, and then, still playing, my mother approached the baby; the snake crawled away and the child was brought to the house. Gentleness was the only way in which the child could have been saved.

It is wonderful how many people escape death in a country so full of snakes. As I am writing this, the papers tell how a boy put his hand into a hole in a wall to rob a bird's nest, but the snake had been before him, and was still in the nest, and the child's hand reached the place where the bird's eggs should have been, it touched the snake, which struck, and the child was dead in a few minutes.—Dr. S. P. Impey, in South Africa Cape Times.

The Control Of Pests

Measures To Be Taken To Overcome Pests In Field and Garden

The greatest menace to agriculture is the large number of insect pests, which, in very little time, cause enormous spread at a alarming rate. These are particularly prevalent and persistent in Canada, and unless some control measures are instituted soon, they will cause a total loss.

Insects may be divided, roughly into two classes, by the nature of their mouth parts, "biting" insects, which bite and chew their food, such as cut worms, leaf eating beetles, etc., and "sucking" insects which pierce the plant and suck the sap of their beaks, such as aphids, the tree bugs, the scale insects, etc. For the first a stomach poison is necessary and for the second a contact insecticide.

"Insects of the Flower Garden and their Control" is a new bulletin of the Department of Agriculture, No. 98, new series. This may be had on application to the Publications Branch, Department of Agriculture, Ottawa, and it will be found a very full treatise on the cultural practices for the control of insects, and also the formulae for insecticides and the way to apply them. Arthur Gibson, Dominion Entomologist, has covered the control of destructive insects in a very full and complete manner in this bulletin, and the work is fully illustrated.

NEW HOME OF THE CALGARY ALBERTAN

When the new building now under construction for The Alberta Publishing Company, in Calgary, is completed, it will be the home of one of the most modern newspaper plants in Western Canada. Occupying a ground space of 75 by 120 feet, the building will cost when completed, apart from equipment, approximately

the use of which will be published on Nov. 10. At the rear of the top floor will be located the commercial printing department. A large community room is also to be located on the third floor, and this will be used, as a general conference or board room. Adjoining the community room will be a completely equipped radio stu-

dio. This will include a radio room, a reception room and a broadcasting chamber. The new building will be served by two elevators, freight and passenger.

Currently planned in all details, modernity has been the keynote throughout, and the Alberta building will conform in every respect to the very latest ideas in newspaper plant construction.

Tourists Should Be Informed

As the tourist reaches our country he should be given a card containing full particulars in regard to highway regulations, the purchase and consumption of liquor and in reference to all other matters with which he should be familiar, while he is a guest of this province. It is a hardship to punish a visitor for transgressing a law in regard to which he has not been informed, and the difficulty which would be completely overcome by the introduction of some such plan as this.

The Ontario gasoline tax next year will be five cents a gallon.

Spain, Venezuela and Persia have been elected to fill the three non-permanent vacancies on the council of the League of Nations.

The Canadian Government telegraph office at Alice Arm, B.C. has been destroyed by fire of unknown origin. All equipment was lost.

Japan has notified Great Britain that she accepts the Anglo-French naval agreement "in principle," it was announced after a meeting of the cabinet.

All records for the current season were smashed on the Thacker farm at Burdett, Alta., where sixty-seven bushels of wheat per acre were threshed on eighty acres.

Different brands of empire-grown tobacco took a prominent place in the tobacco trades exhibition at Manchester, England. The exhibits included an attractive display of Canadian leaf.

A WONDERFUL TRIBUTE

Baby's Own Tablets Declared To Be Worth Their Weight In Gold

A mother who is used to Baby's Own Tablets once to be convinced that nothing else can equal them in banishing the ills of her little ones. Once used, always used, as long as there are small children in the home that is the tribute of thousands of mothers pay the Tablets.

Among the many mothers who are anxious to tell of their experience with Baby's Own Tablets is Mrs. Griffith, of East Hamilton, Ont., who writes: "Shortly after coming to Canada I began giving the Tablets to my baby boy who was then six weeks old. The result was so good that since that time I have always kept the Tablets near and both of them are the picture of health. Baby's Own Tablets are the only medicine they have ever had and I really believe the Tablets to be worth their weight in gold."

Baby's Own Tablets are free from all injurious drugs and can be given to the youngest babe with absolute safety. They are sold by medicine dealers or by mail at 25 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Cling hunting grasshoppers nearly five inches long, that prey on small animals such as mice and the young of ground-squirrels, birds, are found in the Cogg.

The attitude of taking life as it comes is merely mental and therefore attainable.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Penner, Alta., writes: "I am a retired soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day my neighbor asked me if I had ever tried

Farmers' Marketing Tour

Canadian National Railways Tour
To Great Britain and Denmark, 1928

(Continued.)

Historically speaking the Glasgow Town Hall is a comparatively recent building in the Victorian Renaissance style, and the hall in which we were entertained is lofty, airy and in its sheer spaciousness magnificent. Three beautiful wall paintings command attention, one depicting the legend of King Roderick and St. Mungo, the representation of which is still part of the City's coat of arms; a second a Glasgow scene of the mid-19th century and it was interesting to note that in this scene was portrayed a Clydesdale, although the period covered is about 1800. The third is the Last Supper, the stocks of the Clyde before her completion. For all its comparative modernity, the banquet hall can boast a history. Queen Victoria, King George, Queen Mary, and the Prince of Wales have dined in it. Every Prime Minister of Great Britain since 1880 has been the guest of the City there and in 1914, three weeks before the war, the German burgomasters dined there after visiting the shipping centres of Glasgow and Scotland. Only two toasts were honored, "The King" and "The Kaiser," and the German and British Ambassadors were present. When the burgomasters were hurrying home, their trip cut short by the outbreak of the Great War.

Sir David Macdonald and the Corporation entertained us in characteristic Scottish style. The haggis was piped in to the tune of "We've been to the Giller" by the City of Glasgow Police Band, at the end of which ceremony the chairman proffered Pipe Major Gray the time-honored refreshment of haggis, neeps and tatties. The Mayor with the traditional response, "Thanks and a health to you" spoken in Gaelic.

A little secret history attaches to the fine new logan in which we were worn by the Pipe Major for the first time in his honor. It appeared that circumstances had compelled the Corporation to wield the economy axe, and in doing so, they had decided to cut out one pair of trousers from an annual outfit of uniformed city officers. It was proposed to send the money gained as a loan to the Pipe Major, but this would hardly have done in view of the incident of the trousers. Happily, however, the difficulty was overcome by a public-spirited citizen who presented the City with a properly mounted skin.

There were two musical programs. Gairns, marches, strathspeys and reels by the pipe band and selections of City of Glasgow Polka-Powwow in which was honored by playing Canon G. F. GEMMORY, General Manager.

We spent our afternoon watching the city and the harbor, and the European part of our official program, but there was one uncheduled event for which the party was responsible. We had almost completed a wonderful tour, but as the night was drawing in, and perhaps any party of the same size had ever seen. Doors, for which we had been thrown open to us, Privileges, jealousy and the City of Glasgow Polka-Powwow in which was honored by playing Canon G. F. GEMMORY, General Manager.

the use of which will be published on Nov. 10. At the rear of the top floor will be located the commercial printing department. A large community room is also to be located on the third floor, and this will be used, as a general conference or board room. Adjoining the community room will be a completely equipped radio stu-

die. This will include a radio room, a reception room and a broadcasting chamber. The new building will be served by two elevators, freight and passenger.

Currently planned in all details, modernity has been the keynote throughout, and the Alberta building will conform in every respect to the very latest ideas in newspaper plant construction.

wounding their weaker conscience, you are planning against Christ. Therefore, if food in any hindrance to your brother's welfare, sooner than injure him I will never cut flesh as long as I live, never!

The friction match, first made in 1827, consisted of splinters of wood dipped in fused sulphur and then tipped with a mixture composed essentially of antimony sulphide, chlorate of potash and some adhesive gum.

GOVERNMENT LIQUOR CONTROL ACT OF ALBERTA

APPLICATION FOR BEER LICENSE

PUBLIC NOTICE is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a License to sell beer by the glass or open bottle, for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta, and regulations made thereunder, with respect to the following premises, known as: The Garth Hotel, Main Street, Sibbald, Alberta; Lots 7 and 8, Block 1, Plan No. 5593 A.V. Location of beer sales' room ground floor, facing north west corner of building.
Dated at Oyen, Alberta, this 28th day of August, 1928.
THOS. McLEOD, Applicant.

About Town and Country

John F. Miller, sight specialist, of Calgary, Alta., will visit Oyen on Saturday, September 22. Get your children ready for school and don't forget to come early.

Mr. Karl Vonn, who has resigned from service with the Bank of Toronto after two years here, left for Hanna today.

Take a chance! Value for your money guaranteed at the "Post Office" sale of parcels mailed from the Four Corners of the Earth. Also home cooking, candy and farm produce. Saturday, September 29, at J. L. Acheson Hardware, under the auspices of group 1, Oyen Ladies Aid. Proceeds toward church building fund.

Ninth Crop Report

Issued by Department of Agriculture
Edmonton, September 13, 1928

Telegraphic reports received by the Department of Agriculture show harvesting operations proceeding satisfactorily over the whole of the Province. A general rain on September 7, accompanied by light snow in some districts, delayed work for two or three days. Other than this, weather conditions have been ideal. The cutting of wheat is well advanced, but in some scattered districts from 15 to 20% is still standing. The cutting of coarse grains is proceeding rapidly and all harvesting should be completed within a week if the good weather continues.

Threshing is under way in most places with approximately 7,000 combines at work. Large number of combines and swathers have been used and reports indicate that they have worked satisfactorily.

Frosts during the third week of August and a heavy frost on September 7, have caused considerable damage to all except the early crops, but on the whole the grade should be somewhat better than last year's crop, especially in view of the fact that the grain is dry and is grading straight.

Reports from the Peace River state that threshing is well advanced. The crop in this district is somewhat lighter than last year, especially north of the Peace River. A number of points report that the yield of wheat is running from 30 to 40 bushels per acre. The average for the province, however, will likely be about 25 bushels per acre. The estimated acreage in wheat is 670,000 acres. This will bring the wheat crop of the present year practically up to last year's total.

Mr. John P. Korabeek left yesterday for Calgary to attend a meeting of the Hall Board. He expects to return to town tomorrow.

Mr. Arthur Anderson left last Monday to attend the wedding of his sister in Saskatoon.

Mr. and Mrs. Charles L. Dunford and family were Calgary visitors during the latter part of last week.

Mr. T. A. Rogers is the new teller at the local branch of the Bank of Toronto. Mr. Rogers arrived last Sunday from Fairlight, Sask., and commenced his duties on the staff Monday.

Miss Catherine Wright is teaching the junior grades at Oyen school during the absence of Mrs. A. C. Robinson, who is still in poor health.

A new concrete sidewalk was laid in front of the Kerr Hardware last week, making a great improvement to their corner of Main Street.

Oyen's Fall Chautauqua will be held this year on November 20, 21, 22 and 23.

Pianos—I am agent for the following lines: Steinway, Martin Orme (now Matthews), Nordheimer, Sherlock-Manning and use Heintzman. See me before buying. Geo. J. Benbow.

CRITICIZES MOVE TO BRING JOBLESS FROM BRITAIN

Toronto. — Immigration problems formed the chief subject of discussion at a session of the Trades and Labor Congress of Canada, which was held here last night. There were few aspects of the immigration policy left untouched, the highlights of the session were the unqualified denunciation of the British nine-harvester movement and an address by Hon. Peter Hennen, in which the Minister of Labor dealt forcefully with the immigration question.

Mr. Hennen charged that there was a well-thought out campaign being conducted in Great Britain to staminate the Dominion government into bringing British unemployed to Canada by the shipload. The propaganda was motivated by the desire of certain interests in the old country to solve a political problem and encouraged by persons in Britain who wanted to flood the labor market with immigrants for their own benefit.

As an instance of the working of the scheme, the speaker said that advertisements in the old country were telling the people that coal miners were wanted in Canada at high wages as a matter of fact there was a surplus of miners in every coal field in the Dominion.

"It's a lie," declared Mr. Hennen, "to say that the British unemployed are not to work and that they are content to subsist on the dole. They want to work and they are in reports of lots of work and high wages in Canada are eagerly received."

"Canada ought to have something to say about this," he continued. "Canada ought to be part of the stage and we can take up the paper and read calmly that a British magistrate has allowed a man convicted of a crime to go to Canada in sentence if he migrates to Canada."

The Labor minister defended the movement of British miners to Canada for harvest labor, and pointed out that it was separate from immigration policy generally.

"We have seen that men in other parts of the world," he said, "but the British government offered them more money than they could make here, and why should we turn down our own flesh and blood?"

Gambing in Land Values

Says Prices All Over Canada are Higher Than in England

London, Ont. — Gambing in land by all classes of Canadian citizens is one of the major reasons why land at such prices, declared A. G. Duffell, of Toronto, speaking at noon before a luncheon session of the Toronto Planning Institute of Canada convention now being held in the city. The speaker quoted prices to show that land values were everywhere higher all over Canada than in England and other countries and he stated that the chief reason for this was a wholesale speculation in properties all over the Dominion.

Must Carry Parachutes

Copenhagen. — Due to the frequency of accidents this year, all Danish military and naval aeroplanes will be equipped with Irving parachutes from Oct. 1. Military orders decree that no aviators should fly without a parachute attachment.

Infantile Paralysis in Montreal

Montreal. — Four cases of infantile paralysis were reported at the city hall in the past week and Dr. Bouché, medical officer, has issued a warning to take precautions against an epidemic.

Queen Marie May Marry

Budapest. — An unexpected announcement was received here that Queen Marie, of Rumania, widow of the late King Ferdinand and grandmother of King Michael, may become engaged to a wealthy American.

Entertained Prince George Hollywood, Cal. — Prince George who is a lieutenant of H.M.S. Durban now anchored at San Francisco, slipped into Hollywood by automobile and was the guest of Douglas Fairbanks and Mary Pickford.

New British High Commissioner

London, Eng. — Sir William Clark, the new British high commissioner to Canada, accompanied by Lady Clark and their two daughters, are sailing for Canada on the Empress of Scotland.

Africa is inhabited with 140,000,000 black and 400,000 white people.

Old Age Pensions Paid

Amount in B.C. Totalling \$441,222 Up To June Last

Ottawa, Ont. — Old age pensions totalling \$441,222 had been paid up to June last, to 3,150 persons in British Columbia who had taken advantage of the scheme, according to statistics just compiled by the department of labor. Of this amount the federal government paid one-half.

Colony of British Columbia comprised 22 per cent of the population of that province over 70 years of age. The average monthly pension was \$17.47, the pensioners being divided as 1,871 males and 1,279 females.

Property owned by these pensioners is valued at \$1,520,782. Of the pensioners in British Columbia, 271 were previous residents of Ontario, 207 of Alberta, 179 of Manitoba, 179 of Saskatchewan, 75 of Nova Scotia, 37 of Quebec, 18 of the Yukon, and 19 of the Northwest Territories.

Of the 3,150 pensioners, 1,000 of these provinces came into the scheme a proportion paid to the pensioners in British Columbia will be charged to the respective provinces. Saskatchewan has been paying pension since June and expects to have about 1,000 pensioners by September.

Manitoba and the Yukon will be paying pensions soon.

Opportunities in Peace River

Lord Lovat Finds That British Settlers Are Doing Well in North Country

Edmonton, Alta. — "There are wonderful opportunities for British settlers in the Peace River country," declared Lord Lovat, chairman of the British Colonization Committee, on his return to Edmonton following a week's tour in Canada's far-western country.

"I met several of the British families who were settled at various points throughout the Peace district under the 3,000 family scheme, and without exception, all these people are doing well, and are more than satisfied with their venture."

"Many of these men were miners, and few of them had any previous farming experience, but they are now good farmers, and their experience shows clearly that given the will to succeed, lack of experience is no bar to success."

Lord Lovat found that over 3,000 prospectors and settlers have gone into the Peace district this year, and everywhere there prevailed a spirit of optimism for the future.

Submarine Rescue Device

U.S. Navy Tests New Apparatus For Saving Ship Crews

Aboard Submarine Salvage Folly. Off Solomon Islands, B.O. — Success in the tests with the "lung," the navy's new breathing device, intended to enable men trapped in sunken submarines to reach the surface, has been made and if future tests prove as encouraging, all naval subs will be equipped with them.

Three naval divers descended in a diving bell to a depth of 150 feet and arose slowly, breathing high atmospheric oxygen through a mouthpiece from a rubber bag resting against their chests. They reported no discomfort. It is said to be the most practical device ever invented for the purpose.

Will Publish Naval Accord

No Secret Clauses in Agreement Says Briand

Geneva. — The much-discussed Franco-British naval accord is to be published by France through the League of Nations committee of disarmament.

Foreign Minister Briand of France, announced this decision after a speech before the League Assembly in defence of the agreement. He said the understanding would be introduced merely in passing, as an example of efforts being made to hasten disarmament.

In his speech he asserted that there were no secret clauses in the agreement.

Natives Should Avoid War

Geneva. — An earnest appeal that native races should forever be kept outside the range of modern warfare, was made by Hon. J. S. Smith, South Africa's high commissioner in London and representative of the League of Nations, in addressing the League assembly.

Ex-Empress Dagnair III

Copenhagen, Denmark. — The ex-empress Dagnair, the 81-year-old widow of Alexander III, of Russia, and sister of Alexandra, the late Queen Mother of England, is seriously ill here.

New 'Plane Tested

Demonstration At Los Angeles Proves Automatic Landing Feasible

Los Angeles. — A tiny "plane" constructed on a new vertical principle, made successful test flights here demonstrating, observers said, that an aircraft can make an automatic landing.

Merle F. Kelley, who piloted the "plane," was said to have taken the craft from the ground on 8½ seconds, soared sharply upward, cruised at 100 miles an hour and then landed with both hands aloft.

The new principle, was described by A. A. Merrill, inventor, as tilting the wings, which are a single unit, in relation to the speed device in the cockpit.

The "plane" has a short fuselage and very little tail. In its construction the inventor was assisted by Dr. Clark Millikan, son of Dr. R. A. Millikan, Dr. Harry Bateman and Dr. A. L. Klein, of the California Institute of Technology.

U.S. Building De Luxe 'Planes

Passengers Will Be Assured Of Every Convenience For Comfort

Los Angeles, Calif. — Four aeroplanes, capable of carrying 20 passengers, equipped with luxurious private apartments and sleeping berths, are being built by the Keystone Aircraft Corporation at Bristol, Penn. Edgar Scott, president of the firm has announced.

The new monoplanes, the largest ever built in America, are of all metal at design and construction. They can speed at 155 miles per hour. Provisions for hot and cold running water are made in the sleeping compartments and a radio will be installed.

MOST OF BRITISH HARVESTERS ARE MAKING GOD

Winnipeg. — "We are just finding out the slackers, that's all, and I am quite certain that the majority of the men are making god," declared Hon. Robert Forke, Minister of Immigration, following a conference regarding British harvesters, which he held with Thomas Gelsley.

"I have heard that some men have gone to England, Mr. Forke continued, and possibly two hundred more will be back as having failed to make good; but that left something like eight thousand British harvesters in the western fields, and they were heard from because they were too busy working."

He had talked with the physician who had examined 200 of the men sent on their way home and only one out of the lot had been really physically unfit, and he was subject to epileptic fits. The others could have worked had they not lacked the will.

"There is plenty of work," said Mr. Forke, mentioning that 1,500 men had been wanted at Regina this morning. He had himself come back all the way from the west to find that the five British harvesters on his own farm got a good start. He thought the harvesters were not as good as the harvesters because of inexperience were a little shabby," at the same time he agreed that men new to the work were bound to be inferior to experienced hands.

The minister warmly praised the work of Mr. Gelsley in handling of affairs at the immigration sheds under most trying circumstances. "No one could have done it better," he said.

And that there were a number of men who will be returned to the Old Country, Mr. Forke asserted, regardless of their desire about remaining here.

A non-political commission for the supervising of British immigration is not held to be the probability by the minister of Immigration.

"I do not foresee any definite changes which would regulate the immigration, but as a non-political field," he said, "it is likely that it will continue to be in the hands of whatever government happens to be in power."

NEW CABINET IN BRITISH COLUMBIA

Above are pictures of four members of the new cabinet in British Columbia. The year: 1. Premier S. F. Tolmie; 2. W. C. Shelly, minister of finance; 3. Joshua Hinchcliffe, minister of education; 4. R. H. Pooley, attorney-general.

Mentioned For Important Post

Stays He Is Sorry To Leave Canada, But Will Return

Quebec. — "I have left my heart behind me, and an sorry that I did not miss the ship, in order that I might see more of Canada," declared Right Hon. Ramsay MacDonald, former premier of Great Britain, as he mounted the gangway of the Empress of Australia en route for Southampton.

"I am going home full of most pleasant recollections of Canada. You have a wonderful country," he added, "and I hope to be back again next year. If I were left to me I would be back again next month."

"Just as soon as ever I get back to England, I will plunge right into the political fight. The annual meeting of the Labor Party at Birmingham takes place first, and then I shall go to the continent for two weeks, but after that I shall get right into the thick of it, and prepare for the general elections, which will take place next year. The results will be very good for us."

G. W. Stephens, of Montreal, who has been mentioned as a possible selection for the post of Canadian minister to Tokio.

To Aid Non-Agrarians

Reduced Rates Arranged For Families Of Settlers Not Employed On Land

Ottawa. — Details of the extension of the assisted passage scheme to the wives and children of British settlers not employed on the land in Canada have been announced at the department of immigration. Assisted passages were formerly only given families of those who settled on the land.

A reduced steamship fare of \$15.25 has been arranged through the co-operation of the British and Canadian Governments for the wives and children of those who were satisfactorily settled in Canada on June 6 of this year. Children under 12 years of age will be free. The Canadian Colonist railway fare to the destination is the only added charge.

The arrangement has been made in order to implement a recommendation of the agriculture and colonization survey committee made on June 6 last.

In order to avail himself of the reduced rates for his family the settler must only establish that he has successfully established in Canada, and has a reasonable prospect of being able to support them.

To Reduce Traffic Accidents

Encourage Garages To Use Headlight Testing Apparatus

Regina. — Following up the recent conference held to consider ways and means of reducing traffic accidents, the Saskatchewan Government is now encouraging garages and filling stations to equip with a testing device for headlights, to allow a driver to quickly ascertain if his lights conformed with provincial law.

The Saskatchewan law is that the beam must not be thrown higher than 42 inches at a distance of 70 feet. If the equipment installed by the service stations were to come up to government standard, the government would then consider the plan of allowing the proprietors to issue certificates to drivers.

Refuse Trade With Russia

Labour Congress Rejects Resolution To Resume Relations

Toronto, Ont. — Following a heated debate the Trades and Labor Congress of Canada rejected a resolution favoring the resumption of trade relations with Russia. Supporters of the resolution contended that Russia was the only country in the world where the working classes were in control, and that there was a ready market in Russia for products of Canadian industry.

Australia Buys R.C. Apples

Winnipeg. — Commencing with the first of this month the importation of Wealthy apples from British Columbia to South Africa was resumed. For some time this fruit trade was neglected but is now being built up again with the result that one Canadian Pacific Railway carload of the Wealthy variety was shipped from Toronto Arm.

EVACUATION OF RHINELAND TO BE CONSIDERED

Geneva. — There are indications that Foreign Minister Briand of France was ready for serious conversations on evacuation of the Rhineland.

In order to remain in Geneva for a second meeting of the powers on the question M. Briand cancelled a trip he had intended to make to Paris to attend a cabinet meeting.

At the first meeting on the subject, M. Briand, Chancellor Mueller of Germany, Under Secretary von Schubert of the German foreign office, Lord Cusden of Great Britain, V. Scialoja of Italy, M. Igmona of Belgium, and M. Lachi of Japan, conferred.

Both M. Briand and Herr Mueller were smiling when they left the meeting. A communique issued later said:

"Conversations have commenced on evacuation of the Rhineland, the discussion is still continuing and will be resumed on Thursday."

Ramsay MacDonald Sails

Says He Is Sorry To Leave Canada, But Will Return

Quebec. — "I have left my heart behind me, and an sorry that I did not miss the ship, in order that I might see more of Canada," declared Right Hon. Ramsay MacDonald, former premier of Great Britain, as he mounted the gangway of the Empress of Australia en route for Southampton.

"I am going home full of most pleasant recollections of Canada. You have a wonderful country," he added, "and I hope to be back again next year. If I were left to me I would be back again next month."

"Just as soon as ever I get back to England, I will plunge right into the political fight. The annual meeting of the Labor Party at Birmingham takes place first, and then I shall go to the continent for two weeks, but after that I shall get right into the thick of it, and prepare for the general elections, which will take place next year. The results will be very good for us."

G. W. Stephens, of Montreal, who has been mentioned as a possible selection for the post of Canadian minister to Tokio.

Fire Destroys Famous Hotel

Manoir Bistrot At Murray Bay Is Smoldering Ruins

Murray Bay, Que. — All that now remains of the Manoir Bistrot, a famous Canadian summer hotel here, is a smoldering waste of crumbling stone, charred rafters and twisted ironwork. Fire of undetermined origin destroyed the famous hotel, which for years has been a mecca for tourists from other parts of Canada and the U.S.

According to officials of the Canadian Steamship Lines, in Montreal, the loss was estimated at \$100,000, fully covered by insurance. Plans had recently been drawn up for the erection of a new building to be opened in conjunction with the manoir but now it is stated these plans will be altered to include the construction of a new hotel building, which will be erected probably on the site of the destroyed manoir.

Nova Scotia Nominations

Liberals Will Have Candidates To Contest Every Seat

Halifax, N.S. — With 24 candidates already selected, and 13 conventions on the books, the task of choosing the Nova Scotia Liberal nominees for contest in the provincial election is now more than half completed.

Among the four Conservatives re-nominated was Col. Gordon Harrington, Cape Breton Centre, minister of the four, number of the Rhodes cabinet to re-offer. Six opposition candidates were chosen.

The Nova Scotia Liberal party, which was so recently defeated by Liberal organizers that no seats will be conceded the government by acclamation.

Plot Nipped In Bud

Numerous Arrests Made In Spain Following Discovery Of Plot Against Government

New Spain. — Reports from the Franco-Spanish border say numerous arrests have been made in Spain after the discovery of a plot against the government of Primo De Rivera, who is about to celebrate his fifth anniversary as dictator of Spain.

A Hendayo, France, despatch, says the arrests were reported to have been made in Madrid and other Spanish cities.

Gas Poisons German City

Sulphurous Fumes From Lignite Mines Create Panic In Halle

Halle, Germany. — This city, which had a taste of what it might expect in future wartime when aviators attacked cities with gas, was threatened by a cloud of gas from nearby lignite mines poisoning hundreds of people and causing untold suffering. Many were made so ill they had to be treated by doctors.

The whole population was thrown into panic. It was necessary to close the schools.

Los Angeles-New York Bus Service

New York. — Regular daily bus service between Los Angeles and New York was started Sept. 11, with the aid of the ship at Liverpool. Cars are to leave the two cities daily, making the transatlantic trip on a regular time of five days and four hours, or a day longer than the average train time.

France To Honor Tunny

Paris. — Convinced that Gene Tunney learned all about boxing in France, French sportsmen are affixing a plaque to the expert world champion of Pontoise where Tunney, as a Marine, in 1918, took some boxing lessons.

Bomb Factory Uncarried

Lisbon, Portugal. — Government police discovered a bomb factory in Beja, a town of South Portugal. Many bombs were seized and numerous arrests were made.

FEDERAL AID IS PROMISED FOR RICE IN CONGRESS

Ottawa, Ont. — Dr. J. H. Grisdale, deputy minister of agriculture; D. T. Alderkin, manager of the Regina Fair, and J. H. Mooney, prominent western grain grower, have been holding conferences in regard to the export of rice to the United States. It has been agreed that the Federal Government will assist generously in staging the congress, and a prize list of \$200,000 is assured.

There will be valuable prizes for six-pound samples of various varieties of wheat, ten-bushel exhibits of barley, oats, rye, buckwheat and corn, and also for clover, alfalfa, rice and rice straw.

A further conference has been arranged for November and will be held at Regina. To this conference those in charge of the congress will invite experts in agronomy, field husbandry, marketing, and breeding and distilling, and more detailed plans will be formulated.

Abandon Polar Search

Italian Government Gives Up Search For Possible Survivors Of

Rome. — Abandonment by the Italian Government of further search for possible survivors of the "balloon party" in the Noble Arctic disaster was announced today. The announcement was made through the Italian Navy Agency that vessels now in Spitzbergen waters would be recalled.

The announcement of further search for the rapid advance of polar winter, with the imminence of 24-hour darkness and the rapid advance of winter, made further aeroplane search impracticable.

The Norwegian icebreaker Braganza, which has been under charter soon will be released. When this is done the Clitta di Milano base ship of the Italian navy will leave King's Bay on the journey Southward.

Chamberlain Is Improving

Health Of British Minister Of Foreign Affairs Reported To Be Improving

Hamilton, Bermuda. — Sir Austen Chamberlain, British minister of foreign affairs, is reported to be improving in his health. He is in a drizzle of rain. He and Lady Chamberlain and their children embarked on the launch of Col. E. B. Leigh, acting governor of Bermuda, and went ashore for a few hours stay at the Leigh home at Prospect.

This is the first port in Sir Austen's long voyage at which he has disembarked. He and his family contrasted his unaltered steps down the gangplank with the fact that he was carried aboard the ship at Liverpool. Members of the party said that he was showing steady improvement in health.

Gas Poisons German City

Sulphurous Fumes From Lignite Mines Create Panic In Halle

Halle, Germany. — This city, which had a taste of what it might expect in future wartime when aviators attacked cities with gas, was threatened by a cloud of gas from nearby lignite mines poisoning hundreds of people and causing untold suffering. Many were made so ill they had to be treated by doctors.

The whole population was thrown into panic. It was necessary to close the schools.

Bomb Factory Uncarried

Lisbon, Portugal. — Government police discovered a bomb factory in Beja, a town of South Portugal. Many bombs were seized and numerous arrests were made.

Experiment With Flax Straw

Two Tons Threshed Flax Straw From Saskatchewan To Be Sent To Glasgow

Experiments to be conducted with two tons of Saskatchewan threshed flax straw in Glasgow, Scotland, may result in the establishment of "several factories" in this province.

This is the project pictured by R. L. Pritchard, director of the Pritchard Flax Fibre Company, Ltd., Glasgow, Scotland, in a letter to the provincial authorities.

Mr. Pritchard asks that two tons of threshed flax straw be shipped to his firm. He wants the straw baled in the smallest possible bulk in transportable bales of two to four hundredweights each and put on rail to the nearest Eastern Canadian port and shipped to Glasgow.

"We desire to have this waste flax straw after threshing with which to experiment and make flax tow from it," writes Mr. Pritchard. "We trust the economic value of this waste flax cultivation of your North West will give your co-operation in securing what value there is in these short lengths of flax straw which is of no practical use at present."

In the working of flax waste there is no retting or scutching by ear process as the operation of the flares in short pieces of straw is sufficient. We would like to know what quantity of this waste flax straw could be procured throughout Saskatchewan, what district the material would deliver it at the most opportune time after their harvest is finished and what price per ton would induce the flax growers or farmers to save it and deliver it.

If the quantity and cost of procuring it would be an inducement to the company, we would establish several factories to work the straw into fibre in Saskatchewan so that the fibre only would be required to be transported which would greatly lessen the freight."

The provincial authorities will take steps to secure the required quantity of flax straw and the information sought by Mr. Pritchard and do all that is possible to encourage the industry to locate in the province—Regina Leader.

Question Of Dieties

Vitamin Cure For Infectious Diseases Discovered In 1911

In 1911 Dr. Funk discovered the vitamin cure for beriberi, a deficiency disease due to removal of the vitamin core of rice. Soon the vitamin cure for rickets, polyneuritis, beriberi, pellagra and other deficiency diseases were discovered and called vitamins A, B, C, D, the first being fat-soluble "A" and found in fatty foods such as butter, cream, cod liver oil, liver, kidney, egg yolk, ghee, cereals, flaxseed, carrots, sweet potatoes, etc. The water soluble "B" vitamins are found in succulent vegetables such as cabbage, cauliflower, celery, lettuce, parsnips, spinach, potatoes, corn, beans, fruits, nuts, milk and yeast.

More Worry For Bill

The record of a baptism, 1904, found in a Catholic church register, refers to a John Coughlin, believed to have been an ancestor or President Coughlin. This would have been enough to make Mayor Thompson, of Chicago, go on a rampage in the days before his recent collapse.

"Well, now, what time do I have to get to work mornings?" asked the new bird man.

"Any time you like," responded Farmer Pumblebuck. "So's it ain't later than half-past four."

Birds have an extra eyelid which can be drawn over the eyeball to protect it from the sun while the proper eyelid remains open enabling them to see.

Bath Abbey possesses so many windows that it is called "The Lantern of England."

"My husband and I have a joint bank account."

"That must be very awkward."

"No. Very convenient. He pays the money in and I draw it out."

Indian Shew Interest In Red Cross

Blind Indians Of Alberta Impressed By Exhibit Shown At Lethbridge Fair

At the annual fair in Lethbridge, Alberta, where the Provincial Red Cross had an extensive health exhibit, a large number of Indians from the Blood Reserves were interested spectators at the booth. Squarely clothed in blankets of many colors and kerchiefs of brilliant hue gathered around the story of the Red Cross among the sick and crippled children of the province.

The old chiefs were especially impressed by the fact that some of their own tribes had sent children to be cared for in the Calgary and Edmonton hospitals. The names of the Indian patients were received in solemn silence but a look of profound wonder stole over their bronzed countenances as they saw the pictures of lame feet straightened, and twisted limbs restored.

Little Susan Medicine Pipe was a recent patient, while the son of Two Stars is waiting for a vacancy in the wards.

A tall, princely looking young man, Mountain Horse, offered to assist the Red Cross in its annual campaign. He said his mother came forward with a promise to send some hand-made beaded moccasins as her contribution to the little sick children in hospitals.

Uses Novel Rest Cure

Noted Author Finds Handkerchief Over Eyes Keeps Nerves Quiet

Sir Gilbert Parker, the novelist, who recently returned from Palestine, where he went to get data for his novel on David, has, lying about in his hat, a long blue and white spotted handkerchief on the arm of a chair, folded in the shape one used to bind a patient. Asked what it was for, Sir Gilbert said: "I went to Sir Henry Irving's dressing-room one evening. He was lying down with a little blue handkerchief over his eyes, and he said, 'I on this to get ten minutes' sleep every evening; it rests me.'"

"I bought a handkerchief," added Sir Gilbert, "and tried the same effect. I am a very bad sleeper, but when I lie down now I tie one of the handkerchiefs over my eyes, eat very little for the first two days, and I am able to get ten minutes' sleep every evening. I have been using it for the last 27 years. Now, when I am dictating, I tie a handkerchief over my eyes as well as the handkerchief on the arm of the chair. The handkerchief keeps the nerves of my eyes quiet, and so I can dictate for one or two hours without fatigue."

Reliable Weather

Forecasts Predicted

Accurate In About 200 Years Says Boston Meteorologist

Weather forecasts may be expected to be accurate in 200 years, according to George A. Loveland, Meteorologist of the United States Weather Bureau at Boston. Mr. Loveland declares that, with the passing of two more centuries sufficient data will have been collected to make reliable forecasts possible.

Forecasts at present are about 85 per cent. correct, he declares. The weather is controlled directly by the sun, he says, but while astronomy is an exact science which has been studied for centuries, meteorology has been studied for about three quarters of a century.

When the effect of the sun's heat on the earth has been studied for a century more, Mr. Loveland hopes the meteorologist can be accurate predict the weather far in advance.

Not Alleged Correct

Interviewer: "I have been informed, sir, that you began life as a poor bricklayer."

Guest Contractor: "There are two mistakes in that sentence. I began life as an infant, and there is no such thing as a poor bricklayer."

Household—If you hadn't taken so long to get ready we shouldn't have missed that train.

Wife—Yes. And if you hadn't hurried me so we shouldn't have had so long to wait for the next one.

The Guest—"I say, waiter, I believe it's had form to speak disrespectfully of one's elders?"

The Waiter—"No I have heard, sir."

The Guest—"Then I will be silent about this chicken."

The custom of referring to important people as "nobs" had its origin in the "BI nob"—abbreviated Latin for "nobility of a nobleman."

The weasel, whose white winter coat forms the ermine of commerce, is found in various forms from the Arctic to the Tropics.

Would Collect Relics

Of Gold Rush Days

Now Reminders Of Past On Old Cariboo Road

Efforts are being made at Kamloops, B.C. to preserve for posterity some of the few remaining relics that marked the picturesque gold rush of the old Cariboo Road.

The road is now a motor highway becoming increasingly popular with tourists, but a few years ago it was traversed by covered wagons, and horse-drawn teams, while during the height of the Cariboo gold rush hundreds were brought into use as beasts of burden.

Before the country was opened up by the Pacific Great Eastern Railway and the automobile, practically all the freight was carried in horse-drawn wagons hauled by a dozen or more oxen or horses. But today the highway has been completely motorized and there are few reminders of the past except the old log-built roadhouses that years ago were the sole points of contact with the wide stretches of wild country.

Isaac Lehman, of Ashcroft, possesses one of the huge freight wagons which, hauled by a team of others behind sixteen or twenty oxen, could have been seen winding its way along the old Cariboo road in the old days. It is one of the few that remain and Lehman will give it to anyone who wants it.

Lying along the roadside between Quesnel and Barkerville in the old gold country of northern British Columbia is a small relic of the past. Express Company's wagons, used on the trail before the days of steel railways. It is rapidly falling into decay. In addition to the famous old stagecoach, which government-generals and multimillionaires rode to the goldfields, no effort is made to preserve it. Representations may be made to the provincial government to have these relics collected and restored to their original use as a reminder of the province's most romantic pioneer era.

Treatment To Control Smut

Result Of Experiment Conducted By O.A.C. Expert

Experiment conducted in Kent County by a member of the staff of the O.A.C. are reported as follows: In addition to formalin, nine different substances were tried for the control of oat smut, some in the form of dusts and some in the form of sprays. The most effective was the formalin spray which had only a trace of smut. The untreated plots had 24 per cent. smut. Hulls eaten by weevils were quarantined in the case of the spray and sprinkle methods and with copper carbonate dust. Where formalin had been used there was germination injury, where copper carbonate had been used there was only a trace of smut and where no treatment had been given there was 29.2 per cent. smut.

Aged Indian Visits England

The venerable chief, White Eagle, of the Ojibwa Indians, who is now in England, is said to be 105 years old. He has been across the ocean and was eyed with interest by many Britons during the Queen Victoria Jubilee in 1887. He was born in Colorado when Pike's Peak was a pup, and has seen about everything that could happen to the West. He is a good Indian—and still a live one.

The first perambulator was built in 1780 for the baby daughter of the fifth Duke of Devonshire.

Class "A" Fairs

Western Canada's Fine Big Fairs Were Most Successful This Year

On the whole the five big western fairs this summer were an unqualified success. The first of these, at Brandon, was seriously handicapped by frosty rain, and while this could not affect the quality of the exhibits, generally, it did curtail attendance, adding nothing measurable to the count of the visitors at any time. The remaining four shows had the finest of weather, and new attendance records were created at each of them. Featuring the livestock exhibits on this circuit were outstanding entries from outside herds in the beef cattle classes. A uniformity of type and quality seldom attained in widely separated herds was particularly noticeable in Shorthorn classes, and the competition in both Shorthorn and Angus with American entries providing an international aspect was especially keen. Dairy herds from five provinces were strongly in evidence at a number of these fairs, and here again competition was of the best. At all points local entries were well represented, and the stock were fewer than might be desired, this being perhaps less due to the Regina exhibition than to the fact that the fair was held in the heart of the grain belt. It gives a fair to be outstanding in regard to its stock entries.

The mounted cavalry stampede attracted visitors from all parts of Canada and the United States and the popularity of this event continued to grow. A perfect week of hot weather boosted the gate at Edmonton. Saskatoon experienced only a bludge of rain and this proved a deterrent to the eager crowd. New buildings and equipment replacing that lost through fire earlier in the season were completed and ready for the big event, and the Saskatoon management are to be congratulated on the initiative and enterprise which they displayed.

Always Prepared For Guest

Ancient Castle In Ireland Keeps Up Interesting Customs

On the north shore of Dublin Bay stands Howth Castle, an ancient Irish stronghold. It was once a castle, and occupied by a retired naval commander and a former shipmate of King George when Prince of Wales who is careful to keep up its old traditions. At every meal, for instance, an extra place is provided at the table, and is reserved for any stranger arriving.

The origin of this interesting custom goes back to ancient times, when the heir of one of the Lords of Howth was kidnapped by gypsies, and only given back on condition that the hospitality of the castle should never be refused to anyone.

Where Canada Leads

Statistics show that Canada now leads the world in the production of nickel, asbestos, hydro-electric power and newsprint. The Dominion has the second greatest number of telephone lines in use, the second greatest number of automobiles, and the second greatest coal resources, and is first in the production of silver, gold and aluminium.

A visitor to a harvest festival service at country church was admiring the beautiful flowers on the altar and exclaimed:

"Yes," said the old vergar, "they are very nice. I'll admit. They are given away to those who are sick after the sermons."

Newspapers Of Early Period

English Mercantile, Published In 1588, Tells About The Spanish Armada

In answer to the claim made recently in Germany to the effect that the copy of the "Augustine" printed in 1600, now on exhibition at the International Press Exhibition at Cologne, is the oldest newspaper in existence, J. W. C. Bestland, 214 East Broadway, a collector of rare manuscripts, has produced a copy of the English Mercantile, printed in 1588, which he claims is the oldest original newspaper in the world today.

The English Mercantile, which was printed in Whitehall, Eng. on July 23, 1588, carries an account of the sighting of the Spanish Armada off the coast of England.

It is 7½ by 9½ inches in size, contains four pages and is printed on hand-made paper. It was printed during the reign of Queen Elizabeth by Christ Barker, Her Majesty's printer.

Bestland has a copy of The Weekly News, printed in London in 1606 for Jeffrey Chorlton, to have been sold at Chorlton's shop at the great door of St. Paul's Church in London.

It was printed during the week of Monday, January 31, of that year, and contains an account of the execution of Guy Fawkes and seven other persons who endeavored to blow up the House of Parliament during the reign of King James.

The account is headed "Gunpowder, Treason and Plot." The foregoing papers were purchased thirty years ago by Bestland in England at which time he also secured an English prayer book which was printed in 1609.

Bestland also has a copy of The News, printed in London in 1605, containing an article describing the great smallpox plague that occurred in that city during that year. It was published by Thomas Newcomb, of London.

A copy of The London Gazette, published London, September 10, 1665, giving an account of the great smallpox plague that occurred in that city during that year. It was published by Thomas Newcomb, of London.

Stuart River District

Western Canadian Business Men Establish Model Farms In B.C.

J. O. Whiteacre, a well known western Canadian business man who is developing a model farm in the Stuart River District, Central British Columbia, advises that growing conditions have been favorable along the Stuart this year, and that he has excellent crops of wheat and oats. Mr. Whiteacre is performing a great service for the Stuart River section in the efforts he is making to place agriculture upon a profitable basis. The model farm is the model "ranch" of the interior. The Stuart lake and river district is one of the most beautiful parts of British Columbia and the pioneer settlers are establishing some very fine farms. The country abounds in game and fish and trout and other fish are found in every lake and stream.

Steady (to his daughter) — Young McPherson has asked me for your hand, and I have consented. Daughter — You dear old dad! Steady — So never mind going to the dentist's now to have that tooth pulled—wait until you are married.

RAILWAY OFFICIALS AND DIRECTORS ON TOUR

E. W. Beatty, chairman and president of the Canadian Pacific Railway, photographed at the C.P.R. Station, North Toronto, recently together with the party of business men and directors of the company who are accompanying him on an extended inspection of the railway's lines and operations throughout the Dominion. From left to right: A. D. MacTavish, Vice-president eastern lines, Dr. W. W. Chipman, Hon. Senator Senator White, Hon. H. McMillan, President of the Canadian National Railway, and president of the Steel Co. of Canada, Sir Charles Gordon, director of the C.P.R., and president B.N.R. of Montreal, W. A. Black, C.P.R. director, E. H. Herbert, C.P.R. director and president of the Royal Bank of Canada, F. W. Molson, C.P.R. director and head of the Bank of Montreal, and Jeanne Canadiane Nationale.

The Influx From Overseas

Straight Stream Of Settlers Coming Into Western Canada

Settlers have been coming into Western Canada in a steady stream since the beginning of the year, and many of all have gone direct to the farming districts to take up land or to take employment with farmers. Many came to join relatives or friends already settled. Since January 1st, to the end of August, 41,901 settlers from overseas passed through the Winnipeg office of the Colonization and Agricultural Departments of the Canadian National Railway. Of this number 5,000 were British workmen who came out to take part in the grain harvest, many of whom, it is expected, will remain in the country for the purpose of taking up land. The others were mostly agricultural folk from Great Britain, Scandinavia and other northern and central European countries. In addition to regular trains, it required special trains to transport these people from the seaboard and inspectors of the department who meet all trains carrying immigrants, travelled no less than 44,146 miles in the performance of their duty. In addition to the influx from overseas, a large number of farmers and others have come to Western Canada and these the United States this year. Not a few having been attracted by the new land opportunities.

Russians Are Clever Students

New Canadians May Most Creditable Showings At School Here

The Edmonton Journal says editorially: "A Russian lad who started at school during the four months without a word of English has made an average of 91 in Grade 9 examinations. On one subject he made 100, and even in English literature, in which a foreign-born student is naturally at a disadvantage, he was 100. He is a clever student, and it is not to be scornful of the new immigrants who are here. These little, even young Russians who have so short a time here are doing so well."

Oldest Tennis Court Found

Built In England Four Centuries Ago

Four hundred years ago King Henry VIII built the oldest tennis court to exist in this country. The "shut" monarch had taken over the great palace at Hampton Court, which Cardinal Wolsey had built for himself out of his single revenues, but it needed one or two little luxuries, and the tennis court was one. King Hal himself was a player here, and Elizabeth an onlooker. If not more, the most famous of onlookers was probably William Shakespeare, for he was in the country at the time before the court in a round of festivities, which included play of every kind. Greatest of all the games played on this historic court was that one in May, 1585, when our renowned champion, George Lambert, lost his world position to Thomas Pettit, the American, by five sets to seven, in a contest occupying three days.

"These rich people make me sick. What's the use of having money if you don't know how to enjoy it?" "Well, what's the use of knowing how to enjoy it if you haven't got it?"

Employment Bureau Manager: "So you'd like to employ a man. What kind do you want?" "Any kind." "I'd like to have one of those free masons I've heard so much about."

A German engineer is building an automobile 125 feet long, with fuel capacity for a month's travel, to use in the Sahara desert.

"Suddenly a man rushed out and said to me, 'Hands up, or I will blow your brains out.'"

CHAPTER I.—Continued.

"Good-bye old pal," David whistled, his arms about the collie's shaggy neck. The dog turned slowly and unwillingly toward the house. In the meantime, within the house, John McLean and his wife were discussing the possible result of the father's seeming aversion.

"Donald is a great trial to us now," John said the mother, "but we must not forget the happiness he has brought us in his past. He grew long and lovingly at a photograph of her son as a child; then, with head bowed, her lips moved in silent prayer.

"Upon his arrival at the wharf Donald found his baggage, destroyed the pass he had been in the habit of using, as his father was owner of the steamboat line, and bought a ticket to Bangor.

Reaching Bangor, he chose less expensive quarters than was his custom, located at the Penobscot, on Exchange Street. In no more than a few days, he decided to take a stroll. Outside an all-night restaurant was a long string of cars, and from within came the sound of busy laughter.

A feeling of loneliness, coupled with a slight hunger induced him to enter. A big man sitting at the counter, attacking vigorously a T-bone steak, was the centre of interest, as evidenced by the cluster of taxi-drivers and other night-lunchers about him. He wore a wide-brimmed hat, high leather boots, corduroy trousers, a blue flannel shirt, and a red-mackinaw coat hung on the wall behind him. Blood, saturated, half stood up from his head aggressively, and his steady blue eyes were set in a face tanned a brick red.

"Yes, sir," spoke the blond giant between mouthfuls, "he's a he-man of the country, she is. None of your bum chow that I used to get here in these Eastern legit' camp, so-well and beans three times a day, and work in for forty dollars a month from daylight until dark. No, street! Me for the Coast with its four bucks a day. And talk about grub! Say, there ain't any hotel that puts up better scotch than we get in the legit' camp in good old B.C."

He looked around at his audience and, convinced that they were interested, he continued: "Yes, sir! British Columbia for mine, say! What'd you think of three fir logs that makes a carload? Of cedar, or fir, or firs? Of alders that you can't get your arms round? Some different than them toothpicks you get out there," jerking his thumb contemptuously toward the Penobscot River. "And minnows," he went on, "the minnows are filled with minnows, and minnows that ain't never big prospect. Prospectors comin' in every day with new strikes. And he ain't just I seen the fish to think they choked the river; you could damn near walk on their backs. That's the country, fellows. That's the place for you with get-up-and-go!" He finished his repast with a gulp of coffee, fished a sack of tobacco and cotton balls from his pocket, and rolled a cigarette. "A brand new country," he ran on, his eyes shining with enthusiasm, "that ain't here," explored, "and richer 'n a pool of cream. How much do I owe you, boy?" he asked as he drew out a wad of bank notes, peeled a bill from the outside

money, and of the waiter's subsequent remarks.

"That's what the big man disgruntled, 'guess I need a guard.' With the assistance of the obliging night-clerk, who furnished antiseptic and court plaster, he patched the hurts of the much-bruised Westerner."

When the clerk left the room the big man turned to Donald, "my name's Jack Gillis. What's yours?" "Donald McLean."

"Damn good name," he averred, looking Donald over critically. "I'm visitin' my old home in Nova Scotia, he has on 'Comin' here to visit my sister, I'm gittin' homesick for the Pacific Slope, and I'm goin' to hit for B.C. tomorrow morning."

"I'm on my way to Vancouver," said Donald. The effect of this statement on Gillis was electric. "Do you belong in B.C.?" he questioned excitedly.

Donald told him how his glowing description of that land of promise had induced him to go West, and that this would be his first visit to the Coast.

"Well," observed Gillis, "if I've been the means of addin' a hunk to the population of B.C., then Jack Gillis has done his duty."

"That's a real compliment," smiled Donald. "I'll go on the mor'nin' train," remarked Gillis. "I'd like to have you travel with me."

Donald nodded. "To be continued."

Canada Wants No Shirkers

Lord Advocate For Scotland Says There Is No Place For Whiners Here

Canada is no country for "whiners," the Rt. Hon. H. P. Macmillan, Lord Advocate for Scotland, said in an address to the Victoria Canadian Club in referring to the troubles over imported English workers for the prairie harvest fields.

"I should like those who came to this country to read a little of Canada history and understand the nature of the hardships faced by the pioneers here, by their workmen and their children to develop and settle this country," Mr. Macmillan said.

"Workers who come across here with whine and complaint of hardships don't know that they are born. This is no country for whiners. It would never have progressed as it has unless the people who came here, your fathers and sons of you, yourselves, had been willing to endure hardships."

"The man who comes here can't expect to land on a down pillow at once, but must face the spirit of the new land. Canada wants no shirkers."

"And I am sure those who come here and are willing to work and make good use of the land, will find that they are always here. I am satisfied from what I have learned and am anxious to see that among you those who merit a welcome will receive it."

Music Was Wedding Gift

Carried By Radio and Telephone From Switzerland To Manchester

Ernest Schelling, renowned pianist, sat in his villa at Celis, Switzerland, and played wedding music which was heard at Manchester, Mass., U.S.A., by guests at the wedding of Miss Anne Bulen Dennett, daughter of Mr. and Mrs. Carl P. Dennett of Boston and Manchester, and William Chase Paulson, of Santa Barbara, Cal.

The music, which was carried a distance of approximately 4,000 miles by telephone and radiotelephone, was the wedding gift of the pianist who is an intimate friend of the bride's father.

The ceremony took place at 5 o'clock, and 6:15, during the reception, the telephone brought to the Dennett drawing room the strains of Mendelssohn's wedding march. This was followed half an hour by a number of Mr. Schelling's own compositions.

The music was conveyed from Switzerland to London by telephone, thence by radio to Boston, where it was relayed to Manchester.

Farmers whose land was used by passing picnic parties are said that this year crop of pop bottles, pop-corn and bread crumbs should run about 25 bushels to the acre.

One view of an athletic man is the fellow who hires a small boy to cut the grass so he can play golf and obtain a little exercise.

A lightning conductor does not attract lightning; it merely conducts the electricity to earth when lightning strikes a building.

Horses have no eyebrows, and babies no eyelids.

Christies' Biscuits

The Standard of Quality Since 1853.

Every year more and more Christie's

Arrowroot Biscuits are sold because their purity and high quality has always been maintained in the store or on the phone, always ask for Christie's Biscuits.

Chinese Habits and Customs

Everything Is Done Directly Opposite To Western Style

When two Chinamen meet they shake hands with themselves, not with each other. The chief topic of their conversation is food. The boys in China have girls' names and wear earrings; the men fly kites and play marbles; the women wear trousers. Chinese ships have no keels; the roses no scent. Books are read from the back forward and from the right to left. A Chinaman scratches his nose instead of his head when he is puzzled. He can divorce his wife for talkativeness. He never quits a job, but gets a leave of absence and returns.

A Chinaman's dinner starts with desert and ends with soup. He pays more for suet than for beef. Most of his money is made of brass. All domestic servants in China are men. They never talk back to their employers. When invited out to dinner a Chinaman takes a servant along with him to help at table. Should the invited one be forced to remain at home through illness the dinner is sent to him. Chinese who can afford to boil their fish in wine. And if they are rich enough to do so, use silver tooth picks. All beverages are served piping hot in China. John Chinaman imbues freely of cups that lubricate, but seldom seen in an intoxicated condition.

Rob It In For Luck—Back! A brisk rubbing with Dr. Thomas' Electric Balm relieves lame backs. The pain will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. An infirm man in the line comes out and there are ample grounds for saying that it is an excellent article.

Learned His Lesson "Lots of reading on it," he observed, as he perused the text of the bond application with great interest. "I wish to read on my way across the paper. 'I'll bet you didn't read your marriage license that carefully.'"

"Maybe not," was the reply, but ever since I signed that I'm reading everything."

Alpha—"What was the denomination of that bill you loaned me?" Beta—"Episcopalian. I guess; it keeps leech."

Friction is greater between soft substances than it is between hard substances.

There is nothing that has ever been so beneficial to an angler for pain. It is safe, or physician would use it, and endures its use by others. Sure, or several million users would have turned to something else. But get the real Aspirin (as any druggist) with Bayer on the box, and the word *genuine* printed in red.

Teeth and Health

Issued By The Canadian Dental Association and Published By The Saskatchewan Dental Society

THE WISDOM TOOTH Otherwise the third molar, the word "wisdom" being of no real significance excepting as it relates to the period of eruption which is at the approach of adult age.

Perhaps it has been your good fortune not to have had this tooth erupt in, or in, it is often a trouble bearer. It is the dental "dilemma"—generally stunted in size, but frequently almost altogether—but why missing?

This—the gradual lessening of the function of mastication and the reduction of the force of jaw movement, due to the substitution of softer and less gritty foods by civilized man, has led to a marked degeneration of the dental mechanism.

Thus, the jaw bones, so greatly contracted (through disuse), that frequently the jaw is in a condition analogous to that of the eyelid in the case of the blind man—nature cutting off that which goes unused.

As a word merit, occasionally the unnatural retention of this tooth, the jaw so-called "impaction," leads to serious disturbances, neuralgic pains, local infection, or contribution to ill health. When your physician, finding no specific cause for your general ill health, orders that "impacted" wisdom removed, you will better understand the reason.

But don't worry should the wisdom teeth not erupt—the chance are that you have been spared trouble.

Chief Buffalo Child Long Lance

Talented Western Canadian Is Author Of New Book Called "Long Lance"

A man of magnificent appearance came to the office of Connopshall Book Corporation last year and asked questions on the technique of writing a book. He was not seen around the Connopshall office again for about a year. Then he returned with a complete manuscript, left it silently, and was gone again.

The next time the manuscript was circulating around the office, page by page, and being avidly read by half a dozen persons called "Long Lance."

The author was Buffalo Child Long Lance, a chief of the Blood Band of Blackfoot Indians. He had written some as a boy to relieve the tedium of training as a warrior and was educated in the teachings of medicine men and crinoid old braves. He had told the stories of a babyhood on horseback, of buffalo-hunting, bloody fighting, awesome "medicine," of capturing wild horses of war and peace, of dances and happy feasts.

Now a college graduate and an appointee by President Wilson to the White Point; a hero of the World War, and a most charming personality, Chief Long Lance turned up as a literary man of a high order.

The book was a rare contribution to Americana. The publishers prepared to print him to let the book be called "Long Lance."

Chief Buffalo Child Long Lance is a most extraordinary personality. He was born thirty years ago and he was born an ordinary Indian baby on the western plains in what is now Alberta. To tell of his boyhood and the Blackfoot Indians signed a treaty and went to the reservation would take the edge off his amazing book.

Had Some System Hyde: "Your wife is very systematic in her."

Parke: "Yes, wife. She works on the theory that you can find whatever you want when you don't want it by looking where it wouldn't be if you did want it."

New York now has thirty plants turning out airplanes and accessories in the metropolitan area. There are reported to be 700 privately owned planes in the city.

Little Helps For This Week

"The Lord thy God: He it is that doth go with thee. He will not fail thee, nor forsake thee."—Deut. xxxii. 6.

Yet if we will one Guide only. The dearest path, the darkest way. Shall issue out in heavenly day. And we, on divers shores now cast, Shall meet, our perilsous voyage past.

All in our Father's house at last. —Richard Chenevix Trentham.

So long as our existence lasts, we must give up the duty of cheerfulness and hope. He who has guided us through the night also. The pillar of darkness often turns into a pillar of fire. Have patience and perseverance; believe that there is still a future before us, and we shall at last reach the haven where we would be. —Arthur Penrhyn Stanley.

Hard and soft come both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Room Was Too Small

An angler was describing to his friend a salmon he had caught. "How big was it?"

"Biggest salmon you ever saw," said the sportsman.

"That the doctor's explain much to me," argued his friend. "The only salmon I ever saw was in a can. Measure with your hands to give me an idea."

The angler glanced at the walls of the room.

"All right," he said, "but we'll have to go outdoors to do it."

Minard's Liniment for Every Pain.

First Separator Came In 1882

The first centrifugal cream separator was imported into Canada from Denmark in 1882.

Many a man of few words keeps them working overtime.

Are You Ready?

When your Children Cry for It

Baby has little upsets at times. All you care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—give a few drops of plain Castoria. No sooner done than baby is soothed; relief is just a matter of minutes.

Yet you will find your child without use of an infant's doubtful drug. Castoria is a vegetable, safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the cruelest pangs of colic, or constipation, or indigestion.

Children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA
